

VITAC's Dubbers

VITAC customers can order dubbing services to localize their content, allowing viewers to follow a film or program's audio in their native language. Our dubbing solution is delivered by talented voice actors who work in modern studios and use advanced audio equipment to create new audio tracks. To provide the greatest quality, dubbers are trained to capture the emotions and tone of the original audio and can include multiple voice actors and song interpretations.

Characteristics

Our community of dubbers include professionals of different backgrounds, locations, ages, and origins

Dubbers are trained to pay attention to factors like dialogue nuance and lip-flap motion to match lip movements as closely as possible

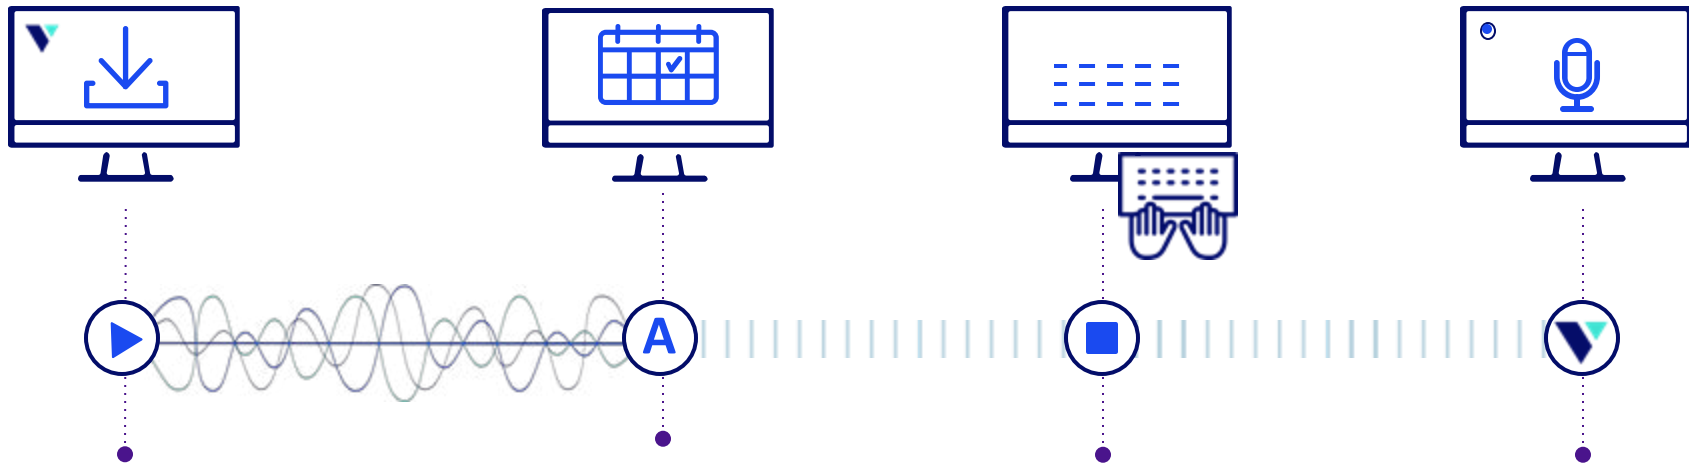

Dubbers are trained to perform idiomatic adaptation, ensuring the final translation communicated the intended meaning of the original video

Dubbers use cutting-edge technology to deliver new audio tracks, including Avid ProTools

How does it work?

The client sends a video sample, and we evaluate the number of voices that are required

A final turnaround time is determined, and voice actors are cast

Translation and idiomatic adaptation of the original file are completed

Dubbers record the new script and the final audio is mixed for the customer
